

## DUONS TELECOM NETWORKS : A LONG LASTING EXPERTISE

With over 5000 telecom networks installed in 130 countries during the past 30 years, Duons remains a key partner for telecom operators, network integrators and industrial end users. Thanks to the exceptional characteristics of its products (robustness, scalability, ease of use, wide coverage and native repeater function) those networks are providing reliable services today.

In order to extend even further the life cycle of its networks, Duons has developed the SRMAX Add-On module for broadband upgrade. This enables customers to enjoy new services with the lowest possible impact on their existing infrastructure & running network while maintaining the native repeater function.

for DUONS  
Telecom Networks

# SR Max

## BROADBAND ADD ON MODULE...

SRmax is coupled to existing SR500, SWING or IRT radio stations and offer BROADBAND to all existing Duons Telecom Networks :

- 2 x 20Mbps data trunk
- Ethernet user interface

## ...TO ENABLE BROADBAND & IP SERVICES...

SRMax ADD-On for Broadband Upgrade offers 2 x 20Mbps full IP datatrunk in addition to the existing running network to enable :

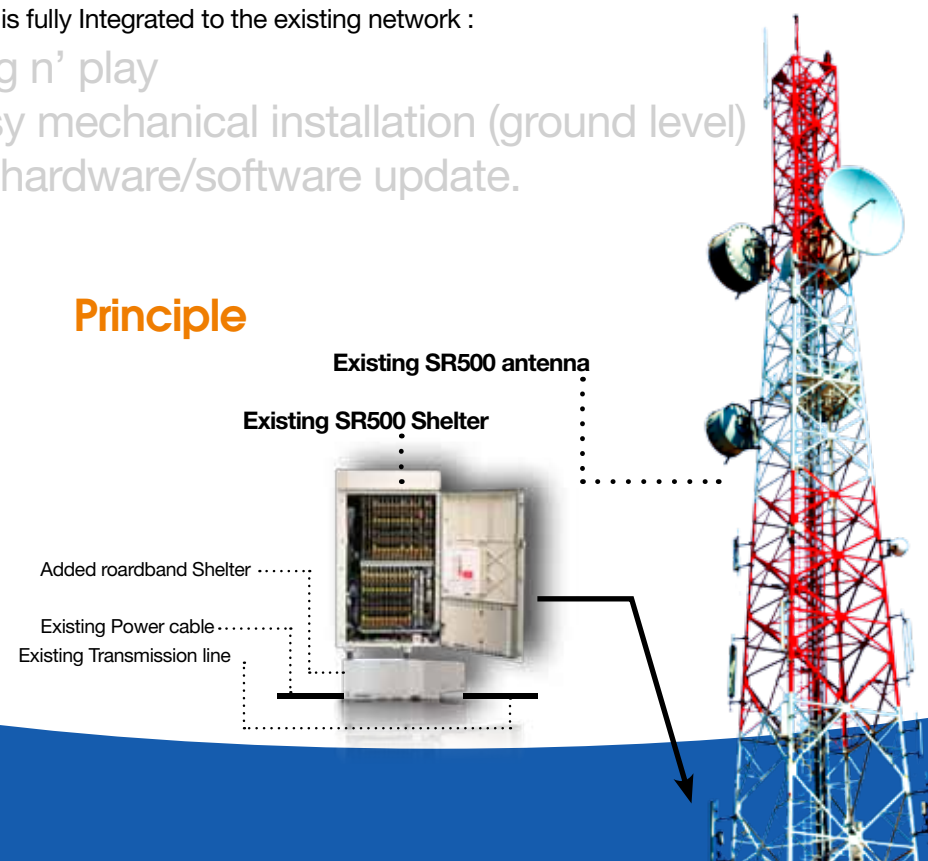

- CCTV
- LAN extension
- Voice over IP
- Any other full IP devices and applications

## ...WITH MINIMUM IMPACT ON RUNNING NETWORK...

SR MAX is fully Integrated to the existing network :

- Plug n' play
- Easy mechanical installation (ground level)
- No hardware/software update.

## ... AT LOW COST

Re using the existing infrastructures, SR Max can save you up to 60% on the cost of alternative solutions :

- No infrastructure cost (pylons, shelters,...)
- Scalable : One module per station
- Easy maintenance at ground level
- No hidden cost
